Meteorologist's View

Mild, even on the tops despite gusty and buffeting winds and quite damp at lower levels, so rather uncomfortable walking with thicker windproof layers. Low level temperatures could reach 16 Celsius in any brighter spells.

Forecast for Friday 11 Nov 2022

Weather: Very mild, but another rather windy and cloudy day with patchy rain and drizzle and areas of low cloud, but cloud tops likely to lower so that some of the summits will be out of cloud.

Maximum wind: Southwest 30mph with gusts up to 45-50mph, reaching up to 60mph on the higher slopes for most of the day.

Chance of cloud-free hill tops 600m: 30%

Low cloud and visibility: Very poor in mostly extensive cloud down to 450m, but occasionally broken or perhaps scattered in east and cloud top lowering to around 700m so some of the tops will be free of cloud. Otherwise good visibility but poor at times in rain and drizzle.

Temperature: **Valleys:** 13 or 14 C, but 18 C is possible in any breaks in cloud.
At 600m: 10 C
Freezing level: Well above summits
